2116

SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/22/2007	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

<b>Office Action Summary</b>	Application No. 09/752,644	Applicant(s) KEDIA ET AL.	
	Examiner Tse Chen	Art Unit 2116	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 23 January 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 29-56 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 29-56 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 29 December 2000 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “wireless headset being coupled to the low-power subsystem through a wireless interface of the low power subsystem” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it

Art Unit: 2116

pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 32 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant did not disclose the subject matter of “the wireless headset being coupled to the low-power subsystem through a wireless interface of the low-power subsystem”; and “a wireless interface to receive verbal instruction from a user through a wireless headset coupled to the wireless interface”. Prior art is still applied.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant did not disclose the particular version or operating class associated with the BLUETOOTH trademark. Examiner submits that different BLUETOOTH versions or operating classes inherently have different characteristics [e.g., specific profile elements] that would affect the scope of the claims. To proceed with prosecution, Examiner will assume the version to be 1.0.

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 2116

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 29, 38, 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barber et al., US Patent 6240521, hereinafter Barber, in view of Hedin et al., US Patent 6185535, hereinafter Hedin.

8. In re claim 29, Barber discloses a method comprising:

- Transitioning a central processing unit (CPU) [high speed processor 42] of a computer system [40] into a low power mode [sleep] [col.4, ll.4-12], the computer system having a computer system memory coupled to the CPU [50, RAM, DISK, fig.2] [fig.3; col.3, ll.36-52].
- Activating a low power subsystem [44 with associated components] that is independent of the CPU when the CPU transitions into the low power mode, the low power subsystem having a subsystem processor [44] that is also coupled to the computer system memory [e.g., 44 coupled to 50] [fig.3; col.4, ll.13-22].
- Independent of the CPU, interpreting the instructions from the user at a unit [44] of the low-processor subsystem [col.2, ll.13-19; col.3, ll.36-52; col.4, ll.13-22; 44 processes user inputs related to word processing].
- Independent of the CPU and in response to the instructions, accessing multimedia data [e.g., contents of memory associated with process state] contained within the computer system memory using the subsystem processor [44] [col.2, ll.13-19; col.3, ll.36-52; col.4, ll.13-22; e.g., 44 accesses data such as multimedia presentations from computer system memory in shared memory space].

Art Unit: 2116

- Presenting the accessed multimedia data from the low power subsystem to the user [col.2, ll.3-29; e.g., 44 accesses data such as multimedia presentations from computer system memory in shared memory space, with specified operating characteristics to be prolonging battery life as being more important than processing speed].
9. Barber did not disclose the instructions from the user to be verbal.
10. Hedin discloses a method comprising:
- Preprogramming voice commands into a computer system in the form of verbal instructions [col.6, ll.31-35; programmable elements].
  - Activating a low power subsystem [101] [col.4, ll.48-65; 101 operates at low power and independent of a higher power CPU 103].
  - Receiving verbal instructions from a user through a unit [headset associated with hands free as is well known in the art] [col.1, l.45; col.1, ll.47-55].
  - Interpreting the verbal instructions from the user at a speech recognition unit [resource] of the low power subsystem as one of the preprogrammed commands [col.1, ll.47-55; col.6, ll.31-35; interprets the simple speech independent of CPU 103].
  - In response to the verbal instructions, accessing data [e.g., phone book] using the subsystem processor [col.4, l.48 – col.5, l.17].
11. It would have been obvious to one of ordinary skill in the art, having the teachings of Barber and Hedin before him at the time the invention was made, to modify the system taught by Barber to include the verbal instruction teachings of Hedin, in order to provide hands free capability while performing multiple tasks [Hedin: col.1, ll.45-46]. One of ordinary skill in the

Art Unit: 2116

art would have been motivated to make such a combination as it provides a way to more conveniently operate a computer system.

12. In re claim 38, Barber and Hedin disclose each and every limitation as discussed above in reference to claim 29. Barber and Hedin disclose the method of operating the apparatus comprising a computer system and a low power subsystem; therefore, Barber and Hedin disclose the apparatus. Hedin discloses receiving verbal instructions from a user as one of the preprogrammed commands through a microphone [col.6, ll.49-50].

13. In re claim 51, Barber and Hedin disclose each and every limitation as discussed above in reference to claim 29. Barber and Hedin disclose the method of operating a low power subsystem; therefore, Barber and Hedin disclose the low power subsystem. Hedin further discloses a processor [235] coupled to the speech recognition unit [227], the processor providing access to a computer system [comprises 201, 203, 205, 207] when the computer system is in a low power mode in response to verbal instructions from the speech recognition unit [col.4, l.48 – col.5, l.17].

14. Claims 31-33, 36-37, 43-50, 54-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barber and Hedin, as applied to claims 29, 38 and 51 above, and further in view of Ditzik, US Patent 5983073.

15. Barber and Hedin disclose each and every limitation as discussed above. Hedin discloses receiving verbal instructions spoken by a user through a microphone [col.6, ll.49-50]. Barber and Hedin did not disclose explicitly the verbal instructions to be received hands free wirelessly [e.g., through a headset].

Art Unit: 2116

16. In re claims 31-32, Ditzik discloses a method comprising receiving verbal instructions from a user through a wireless headset [14, 34], the wireless headset being coupled to the subsystem [51 with associated components] through a wireless interface [32] of the subsystem [fig.7] [col.8, ll.4-58; col.9, l.55 – col.10, l.10; col.11, ll.37-46; col.13, ll.1-30] [Applicant admits Ditzik teaches speech recognition by the computer on pg.9 of appeal brief filed September 6, 2006].

17. In re claim 33, Ditzik discloses, comprising accessing data from a network [external wide area communications network] via the wireless interface of the [low-power] subsystem [col.5, ll.52-59].

18. In re claim 36, Ditzik discloses, comprising presenting the data accessed to a user via a display [fig.3c] of the low power subsystem [col.13, ll.24-30; display graphics].

19. In re claim 37, Ditzik discloses, comprising presenting the data accessed to a user via an audio output [e.g., 14a] of the wireless headset [col.8, ll.4-58].

20. In re claim 43, Ditzik discloses, wherein the wireless interface [e.g., cdma] of the [low power subsystem] connects with a local area network [col.5, ll.52-59; col.8, ll.4-58].

21. In re claim 44, Ditzik discloses, wherein the [low power] subsystem comprises a video display [fig.3c] to display data accessed from the computer system [col.13, ll.24-30; display graphics].

22. In re claim 45, Ditzik discloses, comprising receiving commands at the computer system through the wireless interface as verbal instructions [col.5, ll.52-59; col.8, ll.4-58].

Art Unit: 2116

23. In re claim 46, Ditzik discloses, comprising presenting the data accessed from the computer system through an audio headset as audio data transmitted from a wireless interface [col.5, ll.52-59; col.8, ll.4-58].

24. In re claim 47, Ditzik discloses, comprising sending the data accessed from the computer system to a cellular phone [fig.7; col.5, ll.52-59; col.12, ll.50-67; 14 transmits data to other cellular phones operating in CDMA].

25. In re claim 48, Ditzik discloses, wherein the computer system comprises a main screen [4] and the [low power] subsystem comprises a miniature display screen [fig.3c] and wherein the [low power subsystem] including the miniature display screen is activated when the main screen is closed [col.8, ll.4-58; col.9, l.55 – col. 10, l.10; col.13, ll.1-30].

26. In re claims 49 and 55, Ditzik discloses, wherein the computer system comprises stored multimedia data [e.g, graphics], wherein the low power subsystem accesses the stored multimedia data and wherein the low power subsystem presents the multimedia data to a user through the wireless interface [col.13, ll.24-30; data is presented through the use of cdma].

27. In re claims 50 and 56, Ditzik discloses, wherein the low power subsystem presents the multimedia data to the user over a miniature display screen [fig.3c] of the low power subsystem [col.13, ll.24-30; e.g., display graphics on screen].

28. As to claim 54, Ditzik discloses, wherein the wireless interface further connects to an external network [external wide area communications network] [col.5, ll.52-59; col.8, ll.4-58].

29. It would have been obvious to one of ordinary skill in the art, having the teachings of Barber, Hedin and Ditzik before him at the time the invention was made, to modify the system taught by Barber to include the verbal instruction teachings of Hedin and the explicit wireless

Art Unit: 2116

headset teachings of Ditzik, in order to provide hands free capability while performing multiple tasks [Hedin: col.1, ll.45-46] with low electrical power electromagnetic fields [Ditzik: col.8, ll.4-58]. One of ordinary skill in the art would have been motivated to make such a combination as it provides a safe way to more conveniently operate a computer system.

30. Claims 30, 39-42, 52-53 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barber and Hedin as applied to claims 29, 38 and 51 above, and further in view of Kabelshkov, US Patent 6108663.

31. Barber and Hedin taught each and every limitation as discussed above in reference to claims 29, 38 and 51. Barber and Hedin did not discuss the details of the system memory regarding accessing data.

32. In re claims 30 and 53, Kabelshkov discloses a method wherein accessing data comprises accessing data through a shared database [relational database of 31] of a low power subsystem [30], the method further comprising storing at least a partial copy of data accessed from a computer system [10] memory [34] in the shared database [col.4, ll.36-61].

33. In re claims 39 and 52, Kabelshkov discloses a low-power subsystem [30] accesses the computer system memory [34] through a shared database [relational database of 31] [col.4, ll.36-61].

34. It would have been obvious to one of ordinary skill in the art, having the teachings of Kabelshkov, Barber, Hedin and Ditzik before him at the time the invention was made, to incorporate the teachings of Kabelshkov as the shared database taught by Kabelshkov is well known to be suitable for use in the system of Barber, Hedin and Ditzik. One of ordinary skill in

Art Unit: 2116

the art would have been motivated to make such a combination as it provides an efficient way to access data [Kabelshkov: col.4, ll.50-56].

35. As to claim 40, Barber discloses a disk drive unit coupled to the central processing unit as the computer system memory [col.3, l.42; DISK part of system memory 50].

36. As to claim 41, Kabelshkov discloses wherein the shared database is coupled to the disk drive unit [fig.2], the shared database to store at least a partial copy of data stored on the disk drive unit [col.4, ll.36-61].

37. As to claim 42, Barber discloses, wherein the data contained in the shared database includes multimedia data [col.1, l.65 -- col.2, l.1; multimedia presentations operates with multimedia data which would still be in the shared memory system regardless of which processor is active].

38. Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barber, Hedin and Ditzik as applied to claim 32 above, and further in view of Maruyama et al., U.S. Patent 6760074, hereinafter Maruyama.

39. Barber, Hedin and Ditzik taught each and every limitation as discussed. Barber, Hedin and Ditzik did not disclose explicitly using BLUETOOTH.

40. Maruyama discloses a wireless [phs] comprising BLUETOOTH communicating with the low power subsystem through a BLUETOOTH interface of the wireless interface [col.10, l.54 – col.11, l.23].

41. It would have been obvious to one of ordinary skill in the art, having the teachings of Maruyama, Barber, Hedin and Ditzik before him at the time the invention was made, to incorporate the teachings of Maruyama as the BLUETOOTH [version 1.0] is well known to be

Art Unit: 2116

suitable for use with the headset taught by Ditzik. One of ordinary skill in the art would have been motivated to make such a combination as it provides a way to communicate with a wide variety of devices.

42. Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barber, Hedin and Ditzik as applied to claims 33 above, and further in view of Chen et al., U.S. Patent 5590197, hereinafter Chen.

43. Barber, Hedin and Ditzik disclose every limitation as discussed above. Barber, Hedin and Ditzik did not disclose explicitly the network being an electronic store.

44. Chen discloses a network [fig.1] as an electronic store [merchant processor] allowing an electronic purchase [col.4, ll.46-50].

45. It would have been obvious to one of ordinary skill in the art, having the teachings of Chen, Barber, Hedin and Ditzik before him at the time the invention was made, to modify the system as taught by Barber, Hedin and Ditzik to include the network as taught by Chen, in order to obtain an electronic store allowing an electronic purchase. One of ordinary skill in the art would have been motivated to make such a combination as it provides a way to extend the computer system's capabilities [Ditzik: col.2, l.33 - col.3, l.22].

#### ***Response to Arguments***

46. Applicant's arguments with respect to the previous rejections under 35 U.S.C. 112, first paragraph have been fully considered but they are not persuasive. Applicant did not point to the particular location of the original specification that discloses the subject matter of "the wireless headset being coupled to the low-power subsystem through a wireless interface of the low-power

Art Unit: 2116

subsystem”; “a wireless interface to receive verbal instruction from a user through a wireless headset coupled to the wireless interface”.

47. Applicant's arguments with respect to the previous rejections under 35 U.S.C. 103 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

48. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

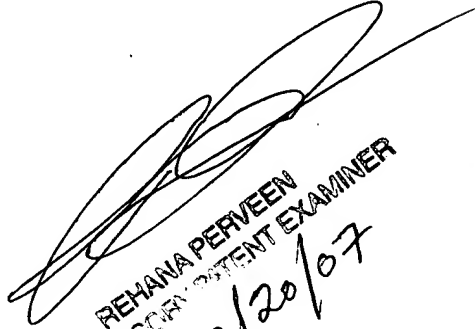

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tse Chen whose telephone number is (571) 272-3672. The examiner can normally be reached on Monday - Friday 9AM - 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rehana Perveen can be reached on (571) 272-3676. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2116

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
